#### 4 First aid measures

#### · 4.1 Description of first aid measures

#### · General information:

Take affected persons out into the fresh air. Do not leave affected persons unattended. Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

#### · After inhalation:

Supply fresh air and to be sure call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

#### · After skin contact:

Immediately wash with water and soap and rinse thoroughly. Do not pull solidified product off the skin.

If skin irritation continues, consult a doctor.

#### · After eye contact:

Protect unharmed eye. Rinse opened eye for several minutes under running water. Call a doctor immediately. Do not remove contact lenses if worn.

#### · After swallowing:

Unlikely route of exposure.

Do not induce vomiting; call for medical help immediately.

- 4.2 Most important symptoms and effects, both acute and delayed Asthma attacks
- Headache Allergic reactions Coughing Breathing difficulty Dizziness

(Contd. on page 5)

Printing date 03.04.2014

· Hazards

Revision: 02.04.2014

#### Trade name: Slow Rise Part A Regular

(Contd. of page 4)

Danger of impaired breathing.

Danger of pulmonary oedema.

Danger of convulsion.

Danger of disturbed cardiac rhythm.

Condition may deteriorate with alcohol consumption.

• **4.3 Indication of any immediate medical attention and special treatment needed** Severe allergic skin reaction, bronchial spasms and anaphylactic shock are possible.

If necessary oxygen respiration treatment.

Later observation for pneumonia and pulmonary oedema.

Monitor circulation, possible shock treatment.

Treat skin and mucous membrane with antihistamine and corticoid preparations.

#### **5 Firefighting measures**

- · 5.1 Extinguishing media
- · Suitable extinguishing agents:
- CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- · For safety reasons unsuitable extinguishing agents: None.
- 5.2 Special hazards arising from the substance or mixture Danger of receptacles bursting because of high vapour pressure when heated. In case of fire, the following can be released: Nitrogen oxides (NOx) Hydrogen cyanide (HCN) Carbon monoxide (CO) Under certain fire conditions, traces of other toxic gases cannot be excluded.
   5.3 Advice for firefighters
- **Protective equipment:** Wear self-contained respiratory protective device. Wear fully protective suit.

· Additional information Cool endangered receptacles with water spray.

#### 6 Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Use respiratory protective device against the effects of fumes/dust/aerosol.
Remove persons from danger area.
Ensure adequate ventilation
Wear protective equipment. Keep unprotected persons away.
Protect from heat.
6.2 Environmental precautions: Do not allow to enter sewers/ surface or ground water.
6.3 Methods and material for containment and cleaning up:
Allow to solidify. Pick up mechanically.
Clean the affected area carefully; suitable cleaners are:
Warm water and cleansing agent
Dispose contaminated material as waste according to item 13.

#### Trade name: Slow Rise Part A Regular

#### · 6.4 Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

#### 7 Handling and storage

#### · 7.1 Precautions for safe handling Use only in well ventilated areas. Take note of emission threshold. Ensure good ventilation/exhaustion at the workplace. · Information about fire - and explosion protection: Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use. Do not spray onto a naked flame or any incandescent material. · 7.2 Conditions for safe storage, including any incompatibilities · Storage: · Requirements to be met by storerooms and receptacles: Observe official regulations on storing packagings with pressurized containers. Store in a cool location. Provide ventilation for receptacles. Information about storage in one common storage facility: Store away from foodstuffs. Do not store together with acids. Store away from oxidizing agents. · Further information about storage conditions: Store in cool, dry conditions in well sealed receptacles. Store in a cool place. Heat will increase pressure and may lead to the receptacle bursting. Protect from heat and direct sunlight. Store receptacle in a well ventilated area. · 7.3 Specific end use(s) No further relevant information available. 8 Exposure controls/personal protection

· Additional information about design of technical facilities: No further data; see item 7.

#### · 8.1 Control parameters

101-68-8 4,4	'-methylenediphenyl diisocyanate	
PEL (USA)	Short-term value: C 0,2 mg/m <sup>3</sup> , C 0,02 ppm

PNECs No further relevant information available. · Additional information: The lists valid during the making were used as basis. · 8.2 Exposure controls · Personal protective equipment: · General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. · Respiratory protection: Use suitable respiratory protective device in case of insufficient ventilation. Use suitable respiratory protective device when high concentrations are present. Protection of hands: Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. · Material of gloves Fluorocarbon rubber (Viton) The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. · Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. · Not suitable are gloves made of the following materials: Natural rubber, NR · Eye protection: Contact lenses should not be worn. Safety glasses Goggles recommended during refilling (Contd. on page 8)

Solvent content:		
VOC (US EPA Method 24)	0 g/l	
• 9.2 Other information	No further relevant information available.	
10 Stability and reactivity		

 10.3 Possibility of hazardous reactions Reacts with alcohols, amines, aqueous acids and alkalis. Contact with acids releases toxic gases. Danger of receptacles bursting because of high vapour pressure when heated. Reacts with oxidizing agents. Exothermic polymerization. · 10.4 Conditions to avoid Store away from oxidizing agents. • 10.5 Incompatible materials: Contact with acids liberates toxic gas. · 10.6 Hazardous decomposition products: Carbon monoxide and carbon dioxide Ammonia Isocyanate

#### 11 Toxicological information

- · 11.1 Information on toxicological effects
- Acute toxicity:

Nitrogen oxides

· LD/LC50 values relevant for classification:

#### 101-68-8 4,4'-methylenediphenyl diisocyanate

Oral LD50 2200 mg/kg (mouse)

#### Primary irritant effect:

- · on the skin: Irritant to skin and mucous membranes.
- on the eye: Irritating effect.
- · Sensitization:
- Sensitization possible through inhalation.
- Sensitization possible through skin contact.
- · Additional toxicological information:

The product shows the following dangers according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version: Harmful Irritant

· Sensitisation: Sensitization possible by inhalation and/or dermal contact.

Printing date 03.04.2014

Revision: 02.04.2014

#### Trade name: Slow Rise Part A Regular

(Contd. of page 9) · Repeated dose toxicity: Repeated exposures may result in skin and/or respiratory sensitivity.

#### **12 Ecological information**

- · 12.1 Toxicity
- · Aquatic toxicity: The product contains materials that are harmful to the environment.
- 12.2 Persistence and degradability The product is partially biodegradable. Significant residuals remain.
- · 12.3 Bioaccumulative potential Does not accumulate in organisms.
- 12.4 Mobility in soil No further relevant information available.
- Additional ecological information:

#### · General notes:

This statement was deduced from products with a similar structure or composition.

Due to available data on eliminability/decomposition and bioaccumulation potential prolonged term damage of the environment can not be excluded.

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

- 12.5 Results of PBT and vPvB assessment
- · PBT: Not applicable.
- · vPvB: Not applicable.
- · 12.6 Other adverse effects No further relevant information available.

#### 13 Disposal considerations

#### 13.1 Waste treatment methods

· Recommendation

Can be disposed of with household garbage after solidification following consultation with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations. Can be burned with household garbage after consulting with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations. Contact waste processors for recycling information.

#### · Uncleaned packaging:

· Recommendation:

Packagings that may not be cleansed are to be disposed of in the same manner as the product. Disposal must be made according to official regulations.

#### 14 Transport information

- · 14.1 UN-Number

#### Relevant phrases

H280 Contains gas under pressure; may explode if heated.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H332 Harmful if inhaled.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H335 May cause respiratory irritation.

H373 May cause damage to organs through prolonged or repeated exposure.

R20 Harmful by inhalation.

R36/37/38 Irritating to eyes, respiratory system and skin.

R42/43 May cause sensitisation by inhalation and skin contact.
